

INCREASE PRODUCTIVITY

Easier setups with a Manual Pulse Generator Pendant for your IMPACT CNC Mini-Mill

- Provides the convenience of a handwheel for precise positioning of each axis for machine setups
- Uses Jog Mode and the Selector Knob
- Three increment settings:
0.0005"
0.001"
0.002"
- Positive "click" control
- Jog axis incrementally or continuously
- Field upgrade requires new EPROMs on motor driver boards

HOW TO ORDER

The MPG pendant is now *standard* on new Impact CNC Mini-Mills.

If you already own an Impact CNC Mini-Mill, field replace the old pendant with a new MPG pendant

Part number #59197* \$1,325.00

*NOTE: When ordering a field upgrade kit (#59197), we need to know what version of motor roms your machine has, how many axes, and what version of Servo CNC software you are using. The MPG pendant requires motor rom version I4.6 or later, CNC for DOS version 4.55, for Windows NT version 5.02.107, for Windows XP version 5.03.107 or higher. Call ServoSource Technical Support if you don't know how to check these items.
